Bhilai, C.G.
July 2016-Apr 2020

Achievements

- Local Social Food Distribution Event (Volunteer)
- College Planting Project Participant
- National-Level Lawn Tennis Player (School)

Professional Summary

Passionate and experienced Java Backend Developer with nearly 1 year of experience, skilled in Java and possessing a strong understanding of Data Structures and Algorithms. I am currently employed at 50Hertz, where I develop applications using Spring Boot and Microservices, manage database operations with MySQL, and handle multiple modules in a Linux environment. I seek new opportunities to further my career and contribute to impactful projects.

Professional Experience

Associate Software Developer, 50Hertz (New Delhi)
[June,2024 - Present]

- Developing applications using Spring Boot, and Microservices, managing database operations with MySQL, and handling multiple modules in a Linux environment.

Associate Technical Trainer, Aptitech Education (Noida)
[Aug,2023 - Jan,2024]

- Led dynamic training sessions in Java and Data Structures & Algorithms (DSA), Skillfully managed a team of trainers

Projects

50Hertz - Manikaran

SAMAST

It's a project for SLDC where they can track the electricity power supply between Generating stations (inter, intra-state) and DISCOM.

Areas of responsibility :

- Scheduling Module (it operates daily power scheduling and power mismatched calculations)
- Open Access Module (it manages Open buyers of electricity based on different contracts with generators).
- Transmission Outage (it operates when generators go off due to maintenance or any other reason).

EPM - Energy Portfolio Management

- It's a project for Chhattisgarh DISCOM where they can manage their daily electricity power purchase from generators
- It's a monolithic application which uses spring batch and XML configuration with Spring MVC structure.

The Support Ninjas

Online Customer Service is a service usually connected to a business or brand that sells products and offers support.

Tech-Use : JAVA | Spring Boot | REST API | MySQL |
Hibernate | Lombok | Spring Data

Areas of responsibility :

- All model classes and complete mapping.
- Created operator and customer modules.
- LogIn/LogOut features with the unique session id.
- Generate a unique OTP to change customers' passwords.

It's a collaborative project built by 2 members in 5 days.
